## Application example

Thanks to the projection of glider 6010, a heading can be created when using a rounded rail, without the rail tilting the top part of the curtain.

Heading with projection glider 6010 width 15 mm

Without heading with glider 4010 width 10 mm

## Mounting guideline

The distance between the brackets can vary depending on the following factors: the mounting surface (wood, concrete or plaster), the weight of the curtains and the curtain fabric production method, the specific application and the system usage intensity. General advice: with the curtains open, place additional brackets where the pleats bunch together. Also place additional brackets before and after bends.
