cord-operated
for light, medium- and heavy-weight curtains

Sturdy and yet discreet

5600

cord-operated
for light, medium- and heavy-weight curtains

sturdy & yet discreet

The Qurails 5600 profile is a sturdy track that can be invisibly mounted on a ceiling. The curtains glide smoothly virtually without sound. Using the cord to open and close the curtains keeps the fabric clean. A very popular track that can be used in a wide variety of situations, such as private homes, but also in office buildings.

- The ideal track for sheers, medium-heavy or heavy curtains.

- Easy to bend and exceptional quality.

- Can be forward or reverse bent in different radii.

- Compatible with the Qurails Flow System for regularly pleated curtains.

- Silent and smooth running, also round bends.

- Keeps your curtains cleaner.

- The cords can run through enclosed channels to ensure they remain less visible and cannot tangle.
Standard colours

RAL 9010 white

RAL 9006 natural metallic
High quality, wear-resistant coating, highly colourfast, UV-resistant.
Other RAL colours & special coatings on request.

Features

Material:	aluminium

Flow

The Qurails Flow System keeps pleats in curtains consistent. It can be used with small and wide channel tracks and, because of the broad assortment of components, it can be integrated in hand-drawn, cord-pulled and electrically operated systems.

The Flow System can also be used with curved curtain tracks. For further information, see the Flow product data sheet.

Specification guide
Material
- Aluminium EN AW-6060-T66.
- Powder coated in accordance with the Qualicoat standard.

Mounting guideline

10 cm   30-50 cm   30-50 cm   10 cm
The distance between the brackets can vary depending on the following factors: the mounting surface (wood, concrete or plaster), the weight of the curtains and the curtain fabric production method, the specific application and the system usage intensity. General advice: with the curtains open, place additional brackets where the pleats bunch together. Also place additional brackets before and after bends.
